## A state-of-the-art Studio facility

As the complete technical solutions expert, WL has grown an unparalleled reputation for supplying its clients with creative and technical excellence. Alongside its extensive equipment inventory and expert staff, the company also has a cutting-edge studio facility called Studio15. Studio15 incorporates a high-specification infrastructure which includes a large format meeting space with video conferencing, pre and post productions audio and video editing suites along with a 120 m2 dedicated rehearsal, teaching and product demonstration space. The space is available to hire exclusively to WL clients and has already been used in the pre-production stages for broadcasts of EURO 2016 and the Winter Olympics 2018.

### THE STUDIO

The Studio is a state-of-the-art studio space that is easily accessible from Central London. Whether you wish to use it as a demonstration space, training area, rehearsal location or even to host meetings and AGMs, the Studio comes as an empty shell that can be configured to suit your exact needs.

The Studio was created with the support of leading AV manufacturers and, as such, features a range of the latest technology. This includes a bespoke audio system based around a DANTE network along with projection equipment from Christie and lighting fixtures from GDS, LSC and ETC. Clients can also supplement this existing infrastructure with additional equipment, as and when required.

The layout of the Studio can be completely transformed depending on the project. The capacity is 60 pax theatre-style or 30 cabaret. For any client who uses the space, they will have an expert WL technician on-hand to assist with the technical support on the day.

The Studio has already played host to high-profile clients such as ITV for their Rugby World Cup studio build along with Discovery Eurosport, who used the space prior to their Winter Olympics 2018 broadcast. It has also been used to host demo days and external training.

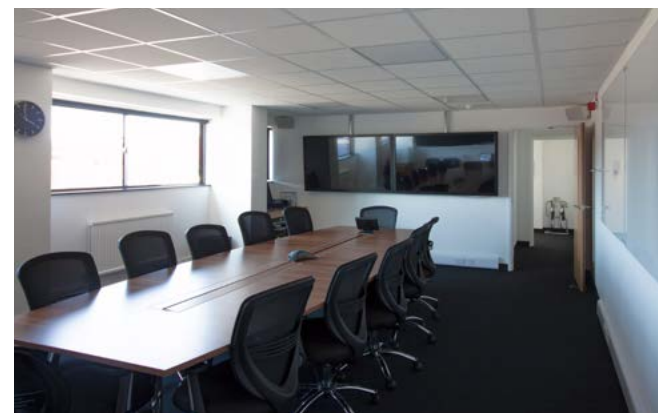

## Two production suites perfect for pre and post editing needs

### PRODUCTION SUITE ONE

Production Suite 1 is a multi-purpose, off-site, completely self-contained production facility. It is the perfect for pre and post editing needs and is often hired as a breakout space for the Studio itself.

The space is run via a Brio Crestron based conferencing system which offers customers connectivity for presentations, work-throughs and meetings. The system is also extremely user friendly, offering complete ease-of-use.

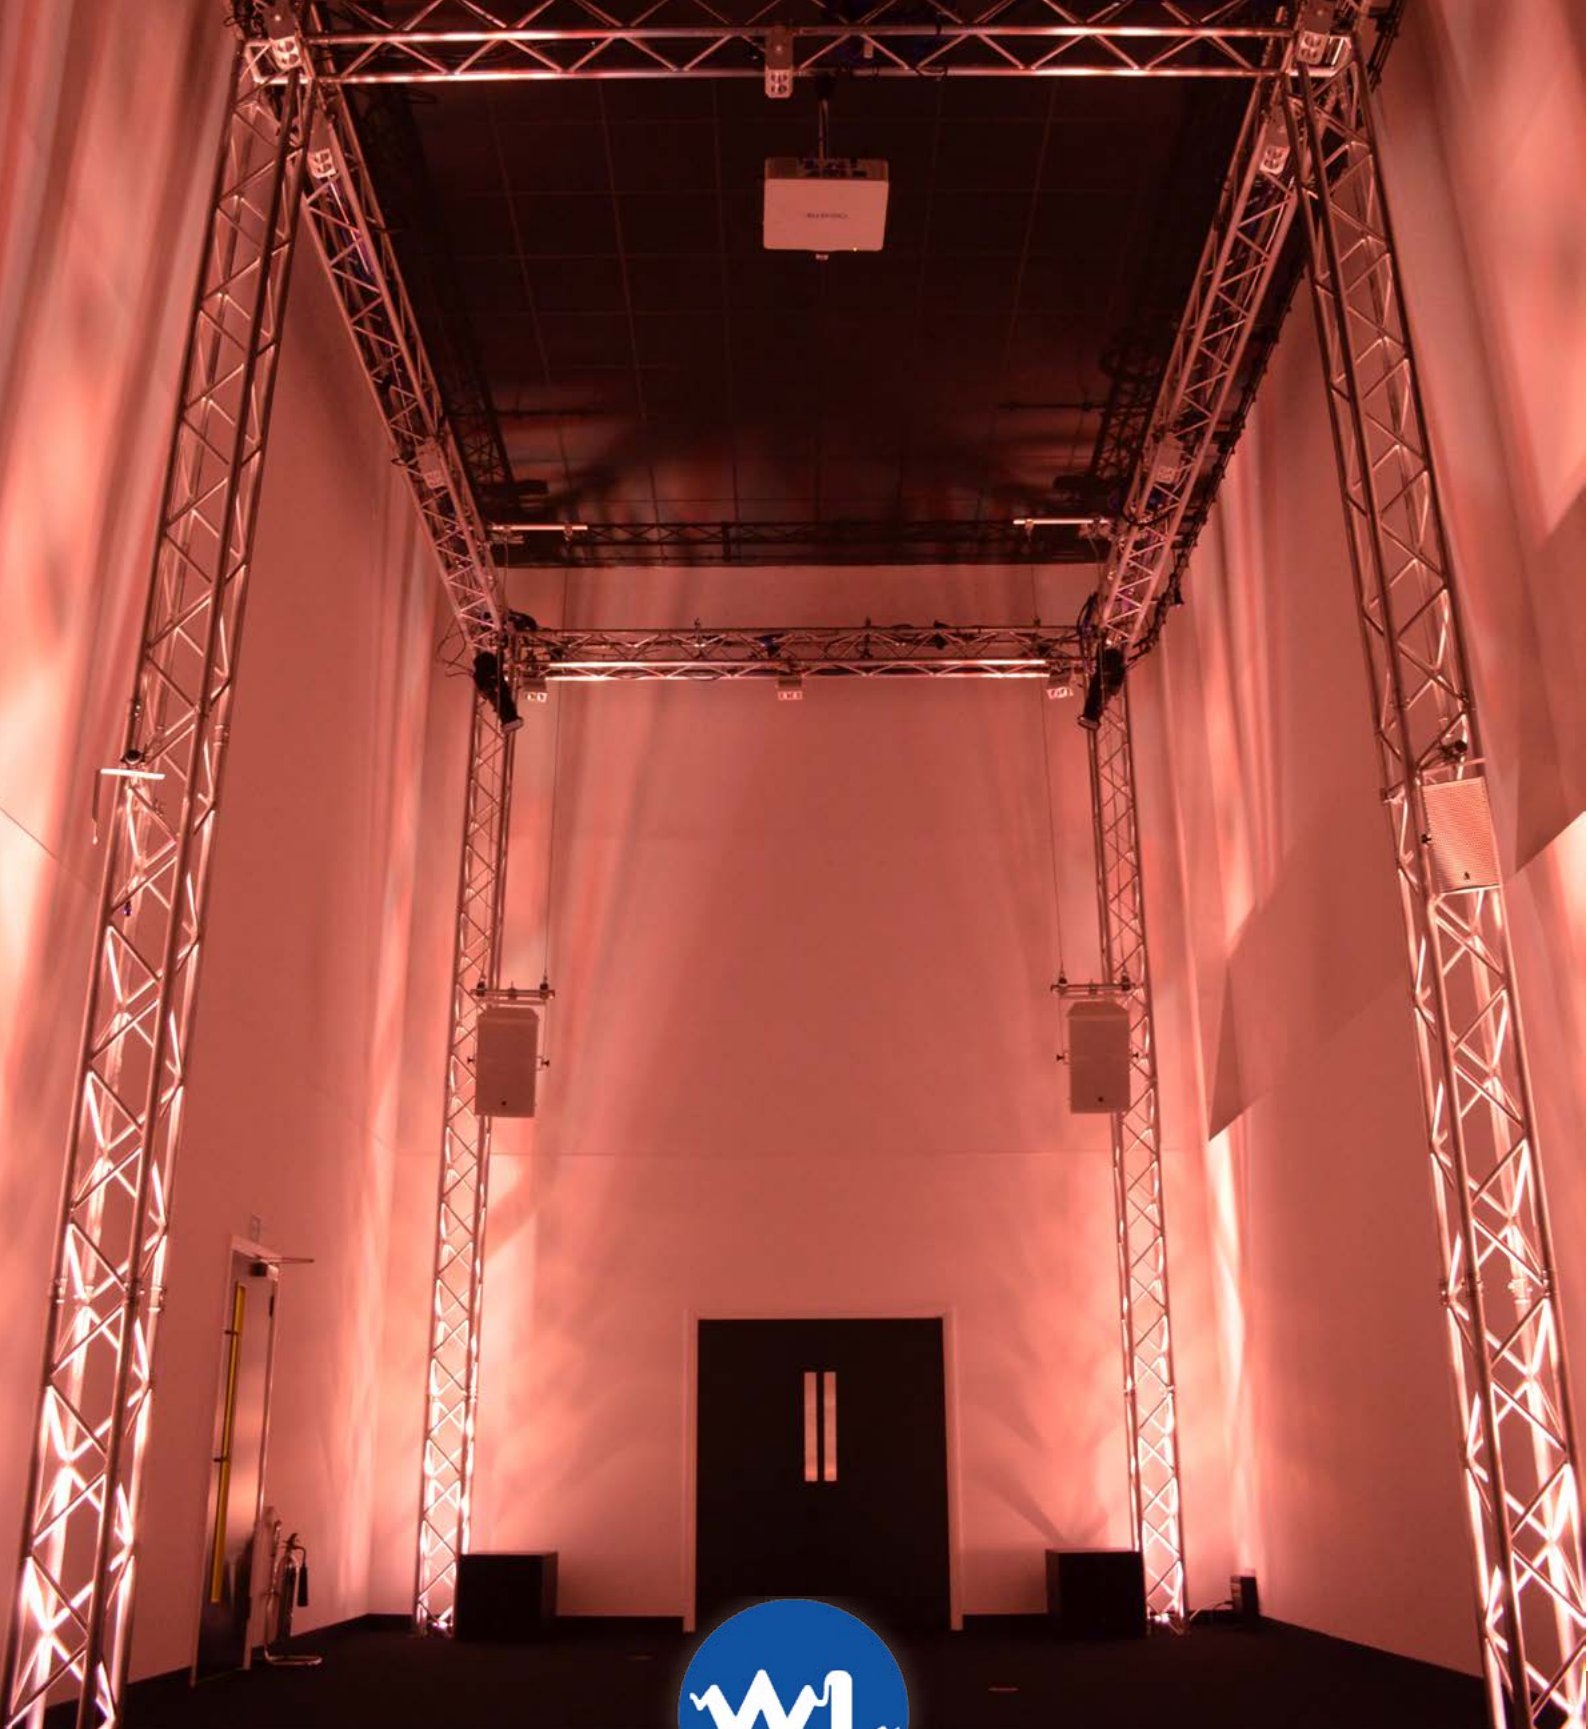

### PRODUCTION SUITE TWO

Production Suite 2 is an audio and video editing suite located adjacent to Production Suite 1. It is the ideal space for recording voice-overs, multi-track mixing and soundscape creation.

The state-of-the-art facilities include a HD Pro-tools system, offering professionals the very highest quality of audio and video. It has already been utilised by ITV Sport, Bloomberg and Discovery Eurosport for their bespoke projects.
